Planet

# Carbon advisory to secure a distinct advantage in the carbon markets

We consult with our clients to develop carbon offset projects, manage risk & regulation, and leverage our experience & expertise in managing carbon assets. Our aim is to support you to identify opportunities, simplify complexities and derive benefits from the rapidly growing global emissions markets.

## Carbon Asset Management & Transaction Services

With our strong transaction management capabilities and market experience, we help clients optimize their carbon asset value through structured transactions

Our experience comes through having transacted over 25 million carbon credits, and 150 million now under management

## Carbon Risk Advisory & Management Solutions

With strong technical expertise and in-depth process & carbon market understanding, we put appropriate risk management strategies in place to manage carbon assets

- By continuously analyzing the Compliance and Voluntary markets in the US, EU, Australia and Japan, we advise our clients on sale timing and price forecasts
- Through our technical expertise with emission reduction projects, we also ensure smooth project registration and offset generation through international process requirements

## Carbon and IREC Offset Generation

Our experience and work across a multitude of emission reduction project types and international offset standards positions us to advise and execute projects for efficient validation, registration & issuance

- Technology experience  
Renewable energy (wind, hydro, solar, biomass), Forestry, Energy efficiency, transportation, and others
- Offset standards  
CDM, VCS, Gold Standard, GCC - IREC, GCC - Carbon, CCBA.
